Courtesy translation of BCM reference letter: Using POLYCAPTOR[®] Universal Absorbent and TRIVOREX[®] Neutralising Absorbent

For safety reasons, BCM COSMETIQUE opted to entrust PREVOR with providing an adapted solution for the intervention of personnel following the spillage of a hazardous product.

Following an on-site demonstration, BCM COSMETIQUE is convinced of the need to invest in the purchase of TRIVOREX[®] and POLYCAPTOR[®] absorbents.

Situation prior to intervention by PREVOR:

In the event of a spillage of a dangerous product, the intervening personnel had access to two kits in which they could find absorbent socks, absorbent sheets and Personal Protective Equipment. Once soiled by the hazardous product, these were then stored in bin liners and placed in plastic drums, to then be treated as hazardous waste.

However, during this handling and when cleaning the polluted zone, the personnel remained in direct contact with the product, with the risk of injuring themselves.

Situation following intervention by PREVOR:

The intervening operator covers the spilled product with POLYCAPTOR® or TRIVOREX®, depending on its dangerousness. Then, the product is agglomerated and collected using a shovel and stored in a drum, which will then be treated according to its nature. The intervening operator only used protective gloves for chemical attacks for this handling and, most importantly, at no point came into direct contact with the dangerous product.

Management of absorbents at Bcm Cosmétique:

Space reserved for MP Warehouses

Display of an absorbent notice of use based on the information communicated by PREVOR and a list of individuals authorised for this usage after training

Conclusion:

Using POLYCAPTOR® and TRIVOREX® enables intervention in complete safety, as they are easy to use and easy to collect and to store. Moreover, after these products have been used, the floor is clean and clear of aggressive or slippery residue.

In short, Bcm Cosmétique is very satisfied at having discovered POLYCAPTOR® and TRIVOREX® and recommends them without hesitation.
